

Career Transition Checklist

Use this guide to plan a job or industry change step by step. Tick items off as you go. It follows the Iskra method: focus on what you want, plan the route, then act and review.

1 Focus *Get clear on what you want*

- ☐ Write down why I want to change, and what I want more and less of in my work.
- ☐ Complete the Values Sort and list my top three values. Check that a target role would honor them.
- ☐ Name my strengths and the skills I most enjoy using, and ask two people who know me what they see.
- ☐ Note what is working well today that I want to keep (people, routines, flexibility).
- ☐ Set my non-negotiables: income floor, location or flexibility, and a realistic timeline.
- ☐ Describe success six months from now in terms I can measure.

2 Plan *Build the bridge*

- ☐ Choose two or three target roles or industries, and research what each one requires.
- ☐ Map my transferable skills to each target role and list the gaps.
- ☐ Decide how to close each gap: a course, a project, volunteering, or a mentor.
- ☐ Update my résumé and LinkedIn profile to tell a forward-looking story, not just a history.
- ☐ Write a 30-second summary of who I am, what I am moving toward, and why.
- ☐ List ten people to learn from and plan the first conversations.
- ☐ Work out my financial runway and a fallback plan.
- ☐ Block a weekly time slot for the transition and protect it.

3 Results *Act, learn, adjust*

- ## My next move

THREE ACTIONS I WILL TAKE THIS WEEK

DATE	WHO	WHAT I LEARNED	NEXT STEP
